

е-НМ

LARGER RANGE, BEST IN CLASS EFFICIENCY AND FULL OFFERING

At home, everyone wants water... Where's the water?

Huge range.
The best solution for most buildings; from family houses up to 10 floor apartment buildings.

e-HMTM is tailored to your water needs.

e-HM bare pump

e-HM pump with pressure switch and pressure tank

e-HM pump with Genyo

e-HM pump with Teknospeed

e-HM residential boosters (2 pumps)

Reduce your energy bills.
State-of-the-art hydraulics with best-inclass efficiency combined with IE3 motors
mean the lowest possible operating costs.

Built to last.
Thick sheet metal casing, high-quality bearings and stainless steel guarantees a long service life.

Almost silent, even when it's working at its peak.

High-efficiency hydraulics, motor and thick sheet metal pump body keep the noise level to a minimum.

Here comes your e- HM[™] solution.

SILENT OPERATION.
High efficiency and thick sheet metal pump body reduces the noise of water circulating inside the pump. Lower speeds on a speed - controlled pump also mean near silent running without compromising on demand or performance.

NO WATER HAMMER. Water hammer is the 'bang' sound in the pipes when a pump stops suddenly. A speed-controlled pump stops slowly eliminating 'water hammer' noise while preserving the system.

STABLE TEMPERATURE.
In an on/off system the cold water is stored in a tank and is slowly heated to the room temperature.
In constant pressure systems, fresh cold water is pumped into the system as soon as you open a tap, keeping the water at your desired temperature at all times

ENERGY SAVING.
A pump uses most
energy when it's at full
speed. Less speed means
less energy.
The relationship between
changes in speed and
changes in head, flow
and power consumption

comes under the affin-

speed by 50%, power

ity law. If you reduce the

consumption is reduced by a massive 82.5%! Our pumps only run at full speed when absolutely necessary, so saving huge amounts of energy compared to a fixed speed pump running in on/off mode. COMPACT SOLUTION.
On/off systems rely on bulky pressure tanks to keep the pump from starting and stopping all the time. In constant pressure systems, the speed controlled pump constantly adapts to demand and bulky pressure tanks are eliminated.

LONGER LIFETIME.
The e-HM is robustly constructed with balanced impellers that help reducing the axial thrust on the motor bearing.
Our variable speed pumps have even longer lifetimes because they seldom need to run at

full speed thus reducing the mechanical stress on their components.

On - Off System

BARE PUMP

The new e-HM makes your self-build system energy efficient and state of the art.

PRESSURE SWITCH AND PRESSURE TANK

A low initial investment, but bulky solution.

Semi-constant pressure system

Full-speed pump with electronic controls. A compact and convenient solution at the right price.

Constant pressure system with variable speed pump

TEKNOSPEED

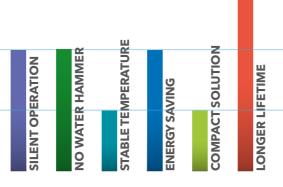

MPACT SOLUTION

Maximum comfort combined with minimum energy consumption.

Xylem |'zīləm|

- 1) The tissge in plants that brings water upward from the roots;
- 2) a leading global water technology company.

We're approximately 12,700 people unified in a common purpose: creating innovative solutions to meet our world's water needs. Developing new technologies that will improve the way water is used, conserved, and reused in the future is central to our work. We move, treat, analyze, and return water to the environment, and we help people use water efficiently, in their homes, buildings, factories and farms. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise, backed by a legacy of innovation.

For more information on how Xylem can help you, go to xyleminc.com.
